Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-22 and 25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cole et al(4,870,287) in view of Nonaka et al(6,094,760) and Blosser et al. (4,507,616).

Cole et al teaches a proton beam therapy system having the proton beam guiding structure as claimed and a rotatable patient gantry, however the details of the patient gantry have not been set forth. Nonaka et al teaches a bed system for proton therapy which sets forth the particulars of the patient table as claimed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the bed system as taught by Nonaka et al with the therapy device set forth by Cole et al to provide the advantage of placing the patient in more positions to provide therapy thereby protecting healthy tissue while focusing the beam on the desired tissue, as is taught by Nonaka et al. Blosser et al. teaches a beam source which is rotatable through only 180 degrees.

Coles also set forth a plurality of treatment stations where the beams are in a fixed position. Nonaka et al teaches using a rotatable beam source. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use

Art Unit: 3736

a rotatable beam guides as taught by Nonaka et al in place of the fixed station of Cole et al. to allow for space savings and to allow one station to be used for all therapy. Further, it would have been obvious to one of ordinary skill in the art at the time the invention was made to limit the rotation of the source as taught by Blosser to reduce the amount of room needed for the device.

Response to Arguments

In response to applicant's argument that the references requires the use of a "caterpillar like floor access" which is not required by the applicant's invention, it is noted that the features upon which applicant relies (i.e., specific type of floor) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Allowable Subject Matter

Claims 23 and 24 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3736

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
